

IP5 Heads and IP5 Industry Meeting ~Global Dossier~

**Daigo Room
Sheraton Miyako Hotel Tokyo, JAPAN
June 1, 2016**

Summary of the 3rd GDTF Meeting

JIPA PROPOSAL:

Considering that (a) importing XML information into internal IP management system can (1) decrease cost for data entry, (2) keep information recent and accurate, and (b) roughly estimated cost for reporting new application filings, office actions, etc. on IP5 cases is about 472MUS\$/year, the following three items in the table were proposed:

XML Tag Standardization	Document Priority	Implementation Step
1. Date Format by ISO8601 (YYYY-MM-DD)	1. Alive/Dead Related Documents (e.g. Office Action)	1. Application Submission System
2. Non-abbreviated English Name	2. Bibliographic Information	2. Public Document Information Sharing
3. Nested Structure for Multiple Items	3. Cited Documents	3. Input and Output through GD

See: <http://www.fiveipoffices.org/industry-consultation/GDTF2016/JIPApresentation.pdf>

IP5 Comment:

JPO agreed that they would share their know-how on system development and operation among IP5 Offices and Industries.

REQUESTS

1. Provision of Development Schedule

- **The five priorities could improve IP management procedure and highly decrease procedural costs. We want to know development schedule of the five priorities in order for us to make our preparation schedule in accordance with it.**

2. Holding Meetings with Tool Venders

- **There are commercial software which can analyze the XML document and import certain data included in the XML documents into IP management system. Their know-how would be very useful and helpful for both IP5 Offices and Users, so please consider to meet with them.**

3. WIPO-CASE for Public Access

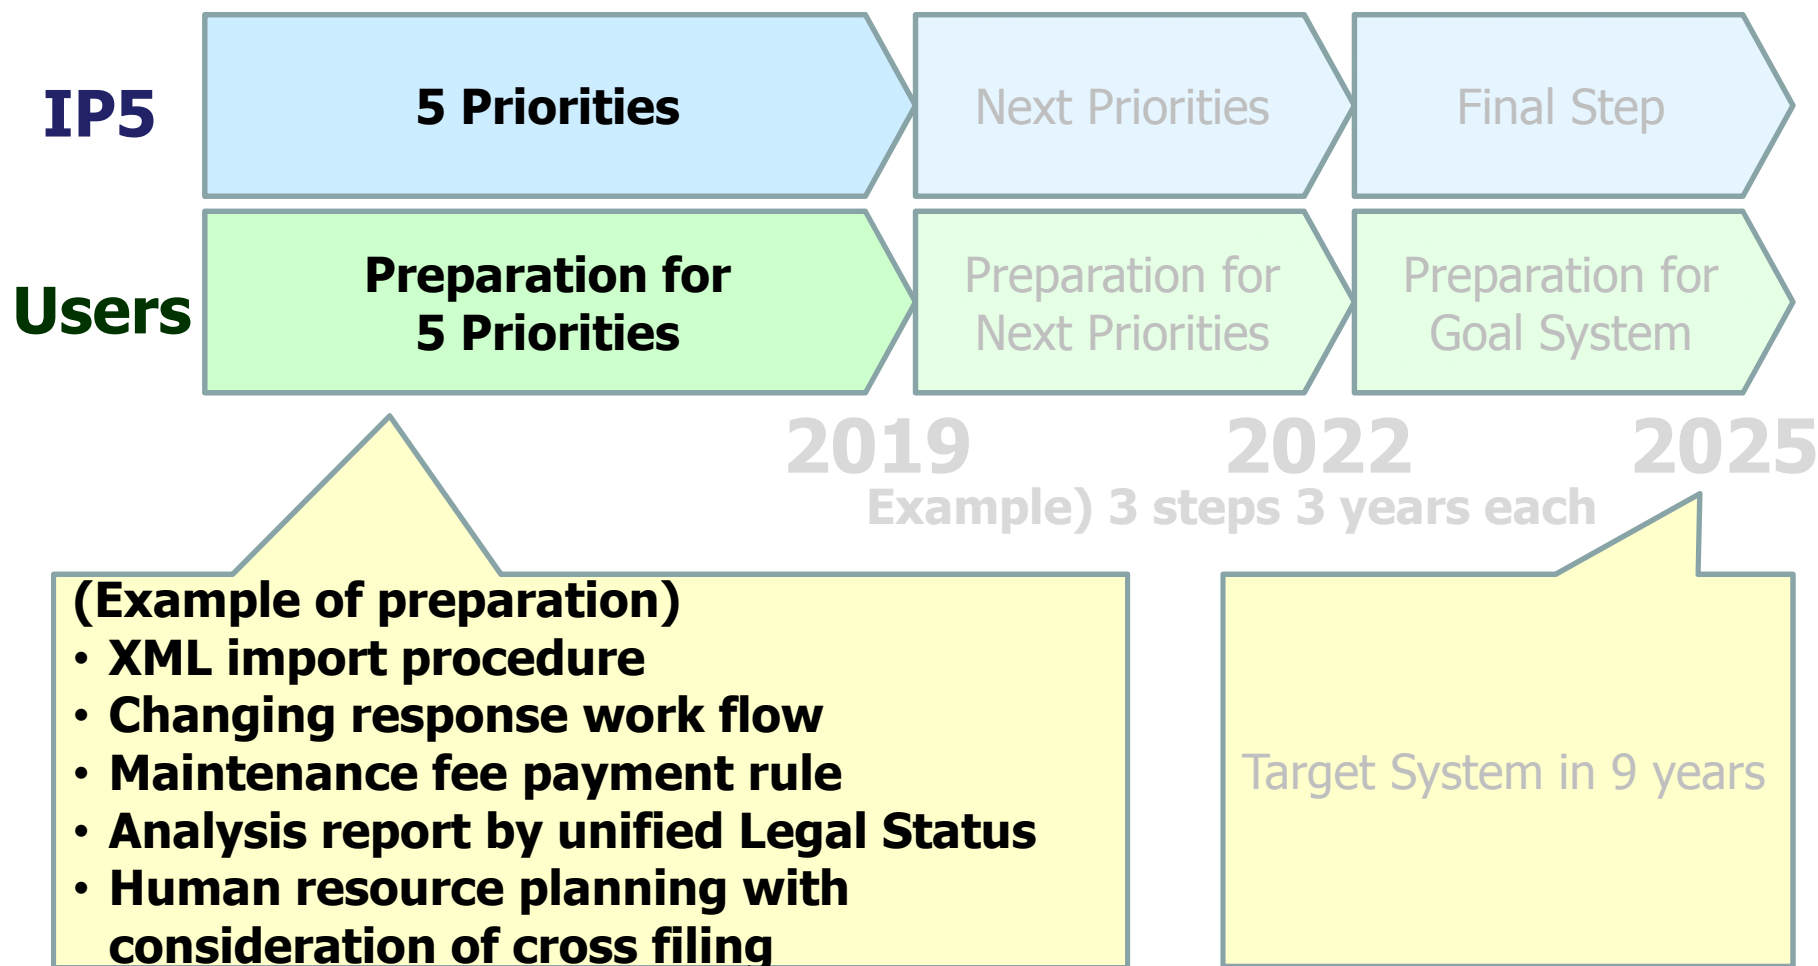

- **WIPO-CASE linkage made it possible to show dossiers of the member countries for examiners. We strongly want WIPO-CASE for public access so that dossiers of WIPO-CASE participants can be accessible from stakeholders in worldwide.**

1. Provision of Development Schedule

Synchronize to IP management system improvement.

2. Holding Meeting w/ Tool Venders

Utilize vender's experiences to improve Global Dossier.

When JPO shares its know-how to IP5 Offices and Industries, the tool vender's know-how on such software should be also included in order to diminish user's concerns, e.g. security, reliability, operability, etc.

The following is a list of URLs of such commercial software:

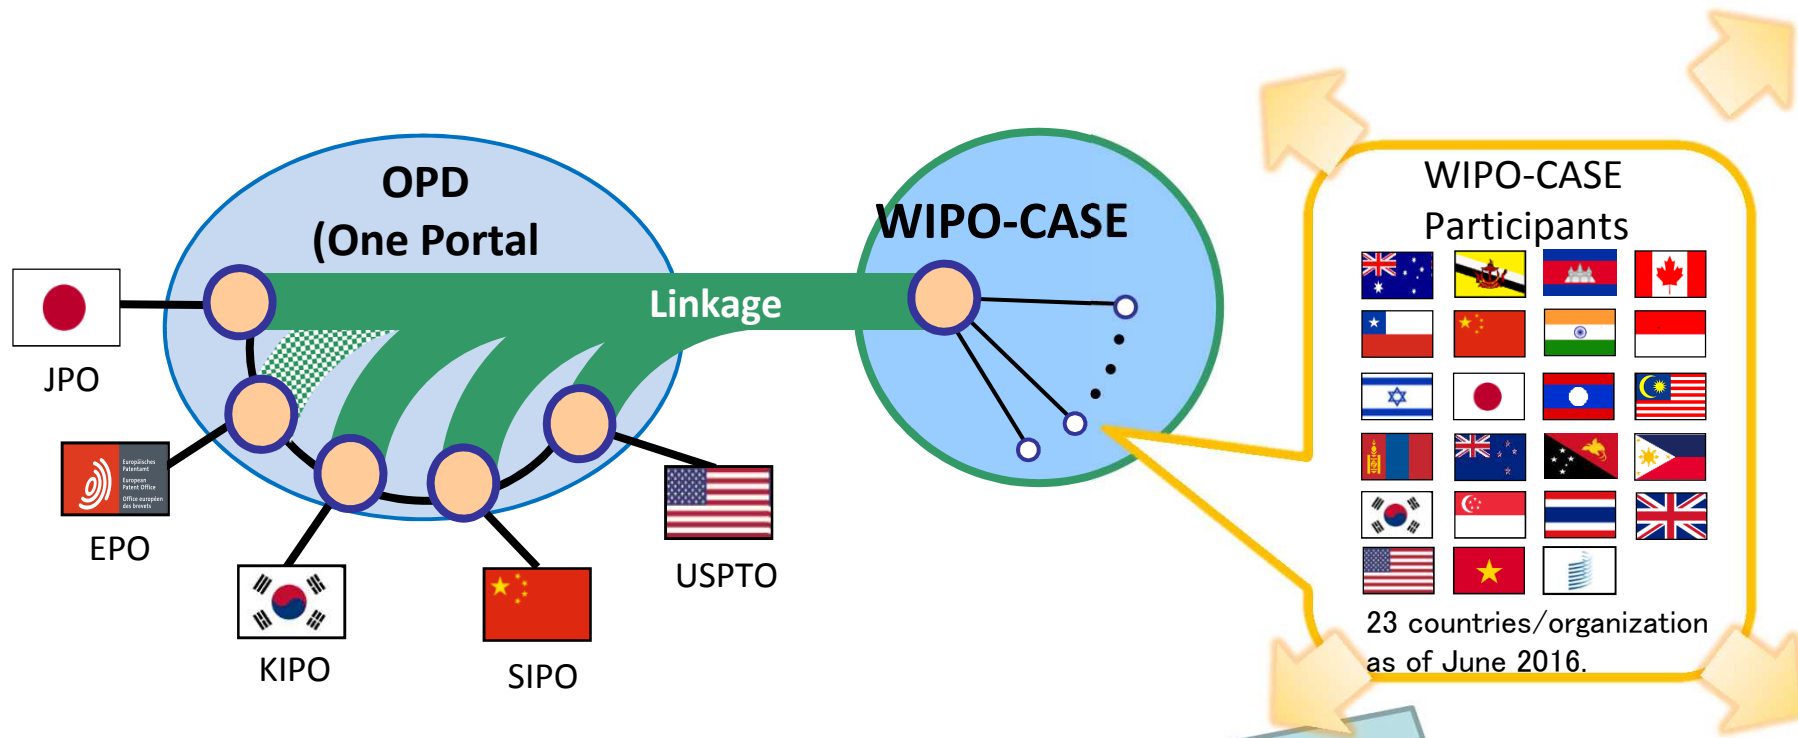

- (1)<http://www.fujitsu.com/jp/solutions/industry/manufacturing/ip/patentmanagement/atms-ppw4innet/>
- (2)https://www.canon-its.co.jp/files/user/pdf/products/patentmanager_pm/catalog_patentmanager.pdf
- (3)<http://www.hitachi.co.jp/Div/jkk/catalog/pdf58-2.pdf>
- (4)<http://www.anaqua.com/corporate/products/patent-management>

3. WIPO-CASE for Public Access

Allow applicants and the third parties to access dossiers of WIPO-CASE participants.

WIPO-CASE for public access could be one of the next targets for the Global Dossier.
